What are Chemistrie Sunlenses?

You’ll Never Look At Clip On Sunglasses The Same Way Again.

Chemistrie Sunlenses are click on sunlenses that preserve the style, comfort and performance of your original lenses and frames.

Once upon a time, clip-on sunglasses were the only alternative for lens wearers who wanted a simple way to change their primary pair of glasses into sunglasses. And for a time, traditional clip-on sunlenses did the best they could. Flip up styles were bulky and awkward-looking, over the frame snap-ons made eyewear heavier and often needed adjustment, spring mounted clip-ons used bulky, obvious fasteners...

But the old clip-on did what it was supposed to do: Change regular lenses into sunlenses without having to buy a second pair of prescription glasses or sunglasses.

Chemistrie Sunlenses Change Everything You Know About Clip On Sunglasses

Now, for the first time ever, your primary pair of lenses can become a fashionable, stylish, high-performance pair of sunglasses—with the Chemistrie Lens Layering System.

Chemistrie Sunleses are the first “click-on” sunlens—a durable, polarized sunglass product that clicks on top of your existing lenses, snugly and seamlessly, using virtually invisible magnets built into your primary lenses. The result is a click-on sunlens that doesn’t look (or act) like a traditional clip-on at all; one that is practically invisible to anyone looking at you! See for yourself in this section of our website (www.eyenavision.com), and see how click-on sunlenses will change the way you look at clip-on eyewear forever.

Product Features & Benefits

Invented by a lifelong optician, Chemistrie Sunlenses change the way you look at traditional clip-on sunglasses by changing the way clip-on’s work, plain and simple. Chemistrie Sunlenses click directly onto your existing lenses using virtually invisible built-in lens magnets. Think of this patent-pending magnetic lens layering system as a stylish lens accent that finally gives you clip-on (click on) sunlenses you’ll be proud to wear. Because almost no one can tell you’re wearing them!

Each Chemistrie Sunlenses product is custom-manufactured on an individual prescription basis—meaning your click-on sunlenses fit your original frames and lenses perfectly: No gaps, no twists, no bends. Your original stylish glasses can instantly become polarized sunlenses in a snap! Or a click.

Chemistrie Sunlenses are:

- **Stylish**: Fit virtually any frame or lens seamlessly*
- **Cool**: 8 classic tints and 8 mirrored tints to choose from
- **Cost-effective**: Choose one or several click-on sunlenses for different lighting conditions
- **Comfortable**: Lightweight, perfectly fitted, easy-on, easy-off
- **High-quality**: 100% titanium nose bridges, permanently embedded spool magnets
- **Trendy**: Never-before seen style, with 12 Swarovski crystal accents available
- **Healthy**: Polarized sunlenses cut harmful glare and increase visual clarity
- **Convenient**: Click on, click off sunlenses store in a slim case, purse or shirt pocket

Click’em on, click’em off, it really is that simple—all at a price that’s usually far lower than buying a second pair of prescription sunglasses.

*Chemistrie Sunlenses are manufactured for all lens materials except glass or acrylic.
What makes Chemistrie different?

**Change Your Lenses Without Changing Your Glasses!**

That’s the Chemistrie Sunlenses difference.

You spend a lot of time and money choosing the perfect pair of frames for your prescription lenses and everyday eyewear. So when it comes to adding sunglasses to your life (and lifestyle), why not preserve the original style, performance and comfort of your original lenses and great frames?

Chemistrie Sunlenses offer a smart, sexy, sensible alternative to buying an expensive second pair of prescription sunglasses; or to wearing bulky, bendy clip-on sunlenses that everyone will notice. Because Chemistrie Sunlenses are really two pairs of lenses in one!

1. Prescription lenses for everyday indoor use or specialized use
2. Attractive, custom-fitted click-on polarized sunlenses that look and feel as good as your everyday pair
